APIA QUALITY POLICY

APIA aims at being a trail-blazing speaker company that comprehensively perceives the quality expectations and goals of its customers, and that constantly improves its whole product range and processes in its value chain.

Due to this purpose:

APIA embraces a company culture that pays attention to quality awareness and investigative point of view, hence contributing to the development of its employees with a people-oriented approach.

APIA provides permanent improvement with its competitiveness incentive to become and stay as a world-class company regarding all standards in its value chain.

With all its stakeholders, APIA carries out social responsibility requirements and executes production via supporting sustainable natural resource usage.

Concerning documentation, certification and regular improvement, APIA applies the ISO 9001 Quality Management System requirements according to all related standards.

Based on the Total Quality Control philosophy, APIA sets to achieve the company and unit goals with an implemented team spirit.

All business processes are evaluated under self-assessment stages, and ameliorative approaches to improve our performances are determined.

At APIA, innovative and creative approach is encouraged with technical and behavioural competence training programs.
